

2018 DRAFT PASS

Welcome to the third annual Pro Football Focus Draft Guide.

For the second consecutive year, this PDF also coincides with a near-identical online component, so if you bought the guide, feel free to check it out at www.profootballfocus.com/products/edge.

The PFF team began analyzing college football in 2014, giving every FBS game the same detailed breakdown as every NFL game, and providing our NFL team customers and fans with unique insights like never before. We now grade every player on every play of every game involving an FBS opponent.

Through this draft guide of player profiles and proprietary statistics, we are unlocking information that fans can't get anywhere else on the planet. We hope you enjoy the deep dive into Pro Football Focus' grades and our analysts' prospect evaluation, giving you a one-of-a-kind look at the top players in the 2018 class.

We'd like to say a special thanks to our loyal PFF followers for making our job—analyzing and discussing football—that much more worthwhile. If you're reading this, be sure to check back every few weeks or so for an updated version of the guide leading up to the draft. And for continuing coverage, be sure to get to profootballfocus.com.

Sincerely,
The PFF Team

QUARTERBACK OVERVIEW

SIGNATURE STATS

Adjusted Completion Percentage (QB)

Taking the commonly-used Completion Percentage a step or two further, we’ve accounted for a set of factors that help better define a quarterback’s performance on passes that were actually aimed at (and delivered to) a targeted receiver. We add back in dropped passes to give the QB credit for getting the ball to its destination and take away ‘attempts’ that were actually throwaways, spikes, or balls that were batted at the line and those that fluttered from his hand when hit as he threw. The result? Top Completion Percentages typically approach or climb slightly past 70%, while Accuracy Percentage leaders will be looking at numbers closer to 80%.

Passing Under Pressure (QB)

A telling set of stats when considering a quarterback’s composure, we’ve assembled tables of data to show how often they find themselves under duress and how they operate in those situations. Who throws it away and who takes the sack? Whose pressured passes have been picked-off most frequently and whose have usually found an open receiver? Every pressured drop-back is counted here.

Deep Passing (QB)

Using our target location data, we’ve selected passing attempts that traveled 20 yards or more in the air. From that sample we offer a look at typical passing numbers as well as Attempt Percentage (number of deep passes relative to all attempts) and show the QB’s Accuracy Percentage on such throws. Whether you are looking to see who is going deep most often or who has been most successful at it, we’ve got the numbers here.

WHAT HE DOES BEST:

- Plays with great anticipation and feel in the pocket.
- Excellent throwing against zone, often leading his receivers into open space with great accuracy.
- Outstanding throws in the middle of the field where he had the 3rd-best grade in the nation in 2016.
- No. 2 grade in the nation throwing at the intermediate (10-19 yard) level in 2016.
- Adjusted completion percentage of 79.0 percent against the blitz was best among draft-eligible quarterbacks in 2016.
- 10th-lowest % of negatively-graded throws among 124 quarterbacks with at least 200 dropbacks.

AREAS TO IMPROVE IN 2017:

- Floats the deep ball too often, must improve his downfield consistency. Graded at 46th out of 116 qualifiers on 20-plus yard passes and ranked 49th on passes thrown 30-plus yards in the air.
- Ranked only 68th in percentage of big-time throws. Improving the deep ball will help.
- Long throwing motion; may not be detrimental given his quick processing ability & feel for the game.

2014	245	155	63.3%	1879	7.7	13	7

WHAT HE DOES BEST:

- Very efficient and quick release.
- True pocket passer with great poise and feel .
- Accurate and quick minded operating the short to intermediate passing game. Also shows some very good deep ball touch.

AREAS TO IMPROVE IN 2017:

- Would like to see more zip particularly, on outside-the-numbers throws.
- Needs to make more tight window drive throws when bodies are around him in the pocket.

2015	249	135	54.2%	1839	7.4	12	8
2014	HS	HS	HS	HS	HS	HS	HS

WHAT HE DOES BEST:

- Loose, whippy arm. Good zip to drive the ball into tight windows and can also throw with touch.
- Incredible runner, looks like a wide receiver with the ball in his hands. Has the speed and agility to be a weapon at the next level. Ran for 1,374 yards on 161 carries (8.5 yards/attempt) on designed runs and 504 yards on 49 scrambles (10.3 yards/attempt).

AREAS TO IMPROVE IN 2017:

- Accuracy must improve. Had the 38th-highest percentage of negatively-graded throws among 124 qualifiers. Too many straight misses and ball location is often lacking, even on completions.
- Tied for 39th with 18 turnover-worthy plays, so can take better care of the ball.

WHAT HE DOES BEST:

- Makes plays both within and outside of structure in Oklahoma's offense.
- Natural playmaker with a great feel for throwing outside the pocket and on the run. Posted nation's top grade on designed rollouts and No. 3 mark when breaking the pocket.
- Excellent accuracy to all levels, including best accuracy percentage when throwing into tight windows.
- Has enough arm to throw with accuracy even when off platform.

AREAS TO IMPROVE IN 2017:

- Big test in 2017 with top playmakers moving on to the NFL. Can he sustain success?
- Room to improve his downfield accuracy, particularly on over-the-shoulder throws.

WHAT HE DOES BEST:

- Smooth thrower with seasoned NFL quarterback fundamentals. Consistently throwing on balance.
- Has all of the necessary throws in his arsenal to drive with power to the outside or in tight windows across the middle, as well with over the shoulder touch and drive touch over underneath defenders in the intermediate part of the field.
- Instinctive with the ability to process quickly and work through full field progressions.

AREAS TO IMPROVE IN 2017:

- Needs to take the easy completion and not hold the ball in the pocket hoping for something else to come open.
- Also needs better decision making outside of the pocket, late in the down.

2014	86	49	57.0%	853	9.9	6	4

WHAT HE DOES BEST:

- Outstanding feel for throwing the deep out/comeback, even from the far Hashmark in college football. Feel for throwing passes along the sideline is unmatched in college football.
- Though he'll float some deep passes, has excellent accuracy at 20-plus yards whether leading receivers into space or throwing more on a line.
- Ranked 12th in the nation in big-time throw percentage and ratio of big-time throw to turnover-worthy plays ranked second.

AREAS TO IMPROVE IN 2017:

- Arm strength comes and goes. Will throw some passes with good zip and others seem to be lacking.
- Must improve his short-area accuracy, particularly on "catch-and-throw" type of routes. Perhaps a hand size issue?

2015	3	1	33.3%	35	11.7	1	0
2014	17	8	47.1%	153	9.0	0	1

WHAT HE DOES BEST:

- Quick/solid arm with enough zip to drive the ball in tight coverage and outside the numbers.
- Classic pro-style QB working in a pro-style system. Consistently works progressions while feeling the pocket and moving within the pocket when necessary.
- Good post snap-processing and wide vision to consistently see the field clearly.
- Tough player who kept standing strong in the pocket despite being under pressure the most in the nation last year at 47.5 percent.

AREAS TO IMPROVE IN 2017:

- Needs a better understanding of where his outlet is when playing under pressure to avoid some unnecessary hits trying to wait for something to happen down the field.
- Could use more consistent ball placement as the target gets further down the field. Ball tends to finish low on the receiver.
- Better decision making when playing under pressure and breaking outside of the pocket (tied for first with most interceptions under pressure with eight).

WHAT HE DOES BEST:

- Arm strength is at another level. One of the best arms we've seen in college football in years.
- Makes spectacular plays outside the pocket and on the move. Had the nation's highest grade on passes thrown when scrambling.
- Had the highest percentage of big-time throws in the nation in 2016.

AREAS TO IMPROVE IN 2017:

- Does not work well in the quick game. Often vacates the concept quickly in order to break the pocket and create outside of structure.
- Misses far too many throws. Had the 24th-highest percentage of negatively-graded throws in the nation and 20 turnover-worthy throws tied for 22nd.
- Sees the game much better when outside the pocket, but must improve his processing ability within the pocket.

WHAT HE DOES BEST:

- Former baseball pitcher with a fast, whip arm and good power to each level.
- For playing in a wide open spread system, shows the ability to get through multiple reads while feeling the pocket.
- Hangs in the pocket and makes tough throws with defenders closing in on him (107.4 passer rating under pressure, third-best in 2016).

AREAS TO IMPROVE IN 2017:

- Could stand to make more plays outside of the structure of the offense.

WHAT HE DOES BEST:

- Smart, calculated player and good decision maker.
- Shows a good feel for the pocket and poise to remain a passer at all times.
- Very effective running the Ohio St system with quick decisions and good accuracy in the intermediate 10-19 range where he posted a 139.0 passer rating.

AREAS TO IMPROVE IN 2017:

- Needs better efficiency on 20-plus yard throws. Was in the bottom third of the country in both adjusted completion percentage and passer rating in 2016 on such throws.
- Can stand to take a few more calculated risks down the field to give receivers an opportunity to make plays.
- Needs added zip outside the numbers and more power when unleashing down the field on go and post routes.

WHAT HE DOES BEST:

- Good decision-maker runs Washington's offense efficiently.
- Adjusted completion percentage of 71.8 percent ranked seventh in the draft class.
- Does a good job anticipating and throwing through zone coverage.

AREAS TO IMPROVE IN 2017:

- Arm strength is a big concern and his lack of velocity showed up in big games against USC, Colorado, and Alabama.
- Ranked only 52nd in the draft class with an adjusted completion percentage of 54.2 percent under pressure.

WHAT HE DOES BEST:

- Looks to create big plays down the field. Average depth of target of 12.9 yards ranked fourth in the class and he leads all returning quarterbacks with 1,240 yards when pressured.
- Ranked sixth in the nation with a 101.7 passer rating under pressure.

AREAS TO IMPROVE IN 2017:

- Adjusted completion percentage of 69.1 percent ranked 40th in the draft class and his 79.0 percent adjusted completion percentage on 1-5-yard throws ranked 40th.
- Overall size and hand size may be an issue.
- Needs to do a better job of working through progressions. Can get locked onto one target.

WHAT HE DOES BEST:

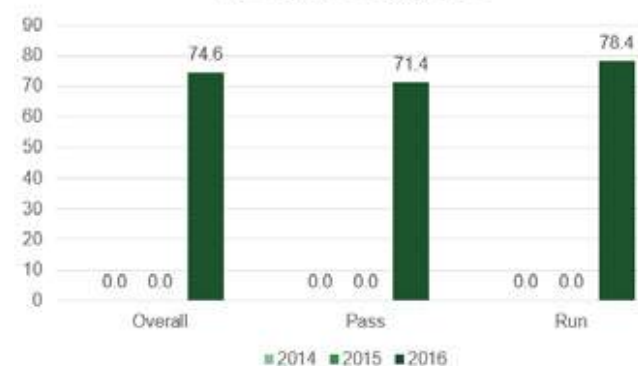

- Strong-armed thrower with a quick snap release.
- Great athleticism and creativity when breaking the pocket and playing on the move. Good running instincts when things break down.
- At his best playing in the timing rhythm passing game with defined coverage looks pre-snap.

AREAS TO IMPROVE IN 2017:

- Better pocket discipline to step up in the pocket and stay within the structure of the route concept.
- Smoother processing and better accuracy when coming off of his first read.
- More consistent ball placement at each level of the field.

2014	42	22	52.4%	124	3.0	0	0

WHAT HE DOES BEST:

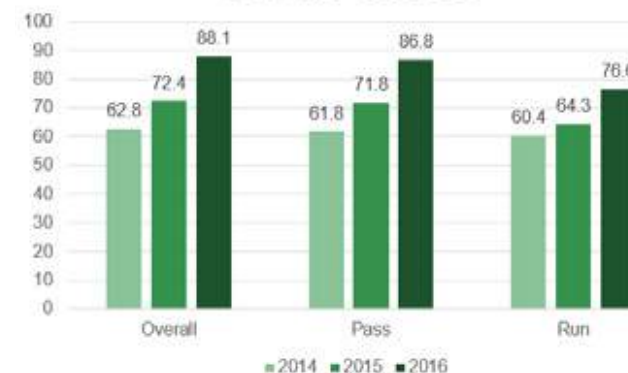

- Very live arm with good zip at each level. Often fits in the cover 2 outside lane shot between the corner and safety with good accuracy.
- Highly athletic player with good pocket quickness to evade and get on the move and pick up yards with his arm or legs.
- At his best with stick throws in the timing/rhythm passing game.
- Took a sack on only 7.8 percent of his pressured snaps, second-best in the nation.

AREAS TO IMPROVE IN 2017:

- Needs more consistent accuracy throwing underneath.
- Can improve his touch in the red zone.
- Can hang and slide within the pocket with better accuracy when forced to reset his feet to 2nd and 3rd reads.

RUNNING BACK OVERVIEW

SIGNATURE STAT OVERVIEW

Elusive Rating

As dependent on their blocking as they are, what are running backs actually creating on their own? The PFF Elusive Rating sifts out their work beyond the help they get. Using the number of missed tackles runners force on all touches (rushing and receiving) and our Yards After Contact tallies, the Elusive Rating formula spits out a score that helps rank the league’s best at making things happen when it’s completely up to them.

Pass Blocking Efficiency

Making full use of our snap data and pressure tallies, plays spent in pass protection are compared to the total number of QB disruptions allowed by each player. The Pass Blocking Efficiency (PBE) formula weighs sacks a bit heavier than hits and hurries and produces a rating that reflects the most efficient pass blockers on a per-pass-blocking snap basis with scores closer to 100 being best. We’ve got these ratings available for full O-line units and individually for tackles, guards, centers, tight ends, and running backs.

2015	182	1082	5.9	695	3.8	56	60	7	2
2014	HS	HS	HS	HS	HS	HS	HS	HS	HS

WHAT HE DOES BEST:

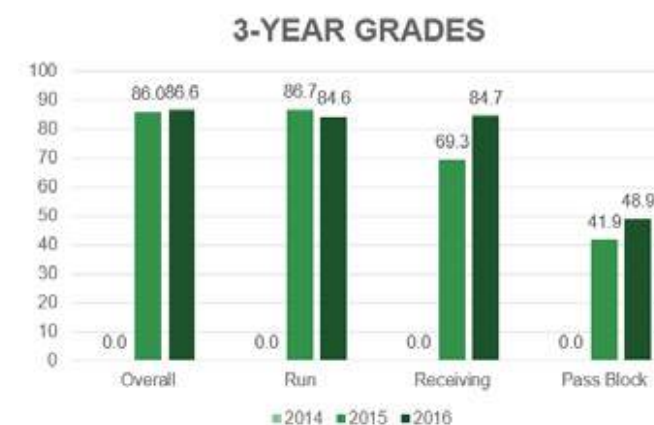

- Big-play threat: ranked third among draft eligible running backs with 9.8 percent of his runs going for explosive (15-plus yard) plays.
- Shrugs off arm tackles with ease and forced a missed tackle on 27.0 percent of his carries, fourth-best among draft eligible running backs.
- Has a good feel for when to bounce the ball to the edge, even on inside runs. Led all returning running backs with 213 yards when rushing off the edge on inside zone runs.
- Weapon in the passing game.
- Good acceleration and burst through the hole.

AREAS TO IMPROVE IN 2017:

- Might be picky, but elusive rating dropped from a nation-leading 126.7 in 2015 to 87.5 in 2016 (11th)
- Dropped four out of his 24 catchable targets in 2015.
- 23.2 percent of carries went for no gain or negative yardage, fifth-highest among draft eligible RBs.
- No draft-eligible running back changed from the initial point of attack as often as Barkley (Whether by choice or due to poor blocking). While he's good at creating outside of the structure of the scheme, he has to show that he can maximize what is given on each play.

2014	HS	HS	HS	HS	HS	HS	HS	HS	HS

WHAT HE DOES BEST:

- Good patience, allows blocks to set up well.
- Hits top speed quickly, accelerates and cuts as well as any running back in the nation.
- Capable of stringing multiple moves together. Creative at the second level, making him a big-play threat. 12.9 percent of carries went for 15-plus yards, best among draft-eligible runners.
- 32.8 percent of carries went for either a first down or a TD, sixth-best among draft-eligible RBs.

AREAS TO IMPROVE IN 2017:

- Adjusting to a new scheme in 2017. How will he handle being the man this season? Will be the focus of defensive game plans every week.
- Some boom or bust to his game as 59.9 percent of his yards came on explosive (15-plus yard) runs, third-highest in the nation.
- Would like to see his role increase in the passing game where he's seen 19 targets in two years.

2014	219	1550	7.1	816	3.7	83	63	14	3

WHAT HE DOES BEST:

- Maximizes what the run blocking gives him. Will pick up yards through contact.
- At his best, has an excellent power/speed combination that allows him to be both efficient and a big-play threat.
- Had the nation's third-best elusive rating in 2014 as a true freshman (113.3) while grading as the sixth-best running back that season.

AREAS TO IMPROVE IN 2017:

- Coming off injury in 2016, Chubb was not in top form for much of the season.
- Forced a missed tackle every 3.6 carries in 2014 and 2015, but forced one every 5.7 carries in 2016. Can he regain his pre-injury form?

WHAT HE DOES BEST:

- Big-play threat. Averaged 6.1 yards/carry in his career and had a run of 50-plus yards in four different games in 2016.
- Good lateral agility led to 7.1 yards/attempt on zone runs, seventh in the nation among running backs with at least 70 zone carries.
- Shows good speed through the hole and shrugs off many arm tackles along the way.

AREAS TO IMPROVE IN 2017:

- Would like to see more in the passing game. Only 25 targets in two years, three drops on 21 catchable passes.
- Lateral agility is good for getting him out of trouble behind poor blocking, but it's sometimes used too often to bounce plays outside of structure rather than burying his head and picking up tough yardage, something he's shown capable of.

2014	HS	HS	HS	HS	HS	HS	HS	HS	HS

WHAT HE DOES BEST:

- Stayed up on first contact on 40.8% of his rushes, third-best in the draft class
- Elusive rating of 104.5 ranked seventh in the nation among running backs with at least 175 carries
- Scheme-diverse: 12th-highest grade on "gap" runs among running backs with at least 50 carries. 8th-best grade in the nation on zone runs among RBs with at least 70 zone carries

AREAS TO IMPROVE IN 2017:

- Only 4.4 percent of runs went for 15-plus yards, 14th-lowest among draft-eligible running backs
- Would like to see more work in the pass game where he's only seen seven targets in two-years.

WHAT HE DOES BEST:

- Shows good patience in 'gap' schemes and posted the 11th-highest grade among draft eligible running backs on gap runs.
- Elusive rating of 80.0 ranked 13th among running backs with at least 175 carries in 2016.
- Good agility in the hole. Can make first guy miss and get to the second level even when blocking is not good. Gained only 1.1 adjusted yards before contact per rush, eighth-lowest among draft-eligible running backs in 2016.

AREAS TO IMPROVE IN 2017:

- Needs to improve his vision and feel in the zone game. Ranked only 69th among draft eligible running backs on zone runs.
- Not a dynamic second-level threat as only 30.3 percent of his yards came on breakaway (15-plus yard) runs, 140th in the nation.

WIDE RECEIVER OVERVIEW

SIGNATURE STATS OVERVIEW

Yards Per Route Run

Not satisfied with Yards Per Catch or even Yards Per Target as sufficient measuring sticks for receiving production, ‘Yards Per Route Run’ makes use of our detailed snap data that breaks down what each player was doing on each play. Total receiving yards is divided by the number of plays a receiver spent out in a pattern to give a mark to their per-snap contribution.

Deep Passing

As with the quarterback’s Deep Passing Signature Stat, this one considers only those passes that travel over 20 yards in the air. For each wide receiver, the numbers posted include: total deep targets, catchable deep passes, drops on deep balls, yards on deep passes, and more, ultimately resulting in Target Percentage (deep targets as a percentage of all targets), Drop Rate, and Catch Rate that serve to put numbers to the notion of the deep threat.

Drop Rate

Sticky fingers or hands of stone, the league’s best (and worst) pass-catchers are highlighted in these tables. Adding up all of the catchable balls every player sees come his way and comparing it to the number that he can’t haul in, the Drop Rate gives black-and-white backing to ‘best hands/worst hands’ arguments.

Slot Performance

As the NFL as a whole grows more and more fond of three-receiver sets, the slot receiver position takes on increased importance. Whether they’re the quick and shifty coverage-shakers or the freakishly big and athletic mismatches, those doing damage from the slot deserve their due. We’ve sorted out everything from the number of routes run from the slot to targets, drops, and even slot YPRR.

2014	0	0	0.0%	0	0	0.0	0.0	0.0	0	0

WHAT HE DOES BEST:

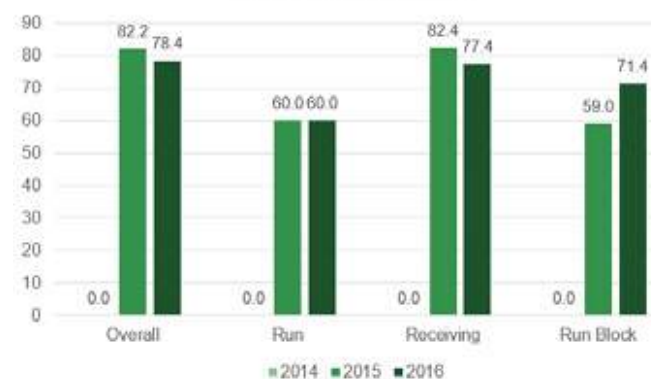

- Excellent speed makes him a big-play threat. 11 catches of 40-plus yards over the last two years, though that would like be a lot higher in a different offense.
- Smooth route-runner who can get in and out of breaks while maintaining top speed.
- Posted the No. 2 grade among true freshman receivers in 2015.
- Scored three touchdowns on screen passes in 2016, tied for third in the nation.

AREAS TO IMPROVE IN 2017:

- Inconsistent quarterback play limited his production a year ago. Would like to see him regain his form as the go-to guy in the Alabama passing attack.
- While he cut his drops from 13 to nine in 2016, there's still room to improve, particularly when it comes to concentration drops as he allowed four screen passes to hit the ground last season.
- Will be 23 years old in December, so expectations will continue to be high.

WHAT HE DOES BEST:

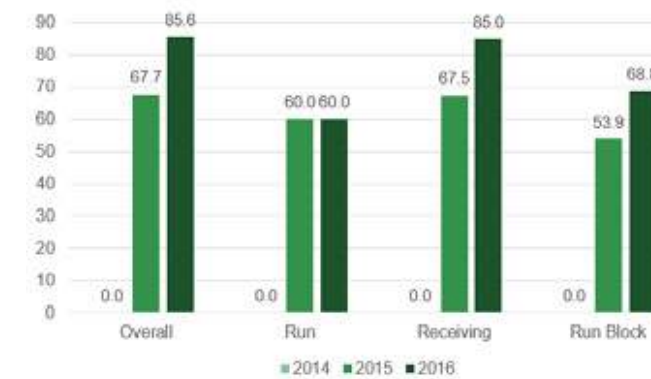

- Sure hands. Dropped only two of 61 catchable passes in 2016.
- Caught 55.6 percent of his deep (20-plus yard) targets, 10th-best in the nation in 2016.
- Forced a missed tackle on 26.7 percent of his targets, fifth-best among draft-eligible receivers with at least 50 receptions last season.
- Explosive, smooth athlete that shows both in his route-running and after the catch.

AREAS TO IMPROVE IN 2017:

- Will be featured and game-planned for by opposing defensive coordinators. Will he produce?
- While he had his moments in contested situations, could stand to be more physical at the top of routes and at the catch point.

WHAT HE DOES BEST:

- Big-play threat. Averaged 20.2 yards per reception in 2016 and knows how to use his hands to separate at the top of routes.
- Forced 12 missed tackles on only 56 receptions and averaged 7.7 yards after the catch per reception.
- Ranked second in the draft class with 3.74 yards per route.

AREAS TO IMPROVE IN 2017:

- Dropped five of his 61 catchable targets in 2016.
- Graded at only 51.7 as a run blocker in 2016.

WHAT HE DOES BEST:

- 3.62 yards per route ranked third in the draft class in 2016.
- Did not drop a pass in 2016 after dropping eight of 47 catchable passes in 2015.
- Forced 19 missed tackles on only 93 career receptions.

AREAS TO IMPROVE IN 2017:

- Can he maintain his production with a new quarterback?
- Only 851 career snaps, so still relatively inexperienced.

WHAT HE DOES BEST:

- Tough player, can make plays in traffic. 38 of 56 non-screen receptions came in between the numbers.
- Shiftiness to create separation when given a two-way go in the slot. His 2.08 yards/route in the slot ranked third in the Pac-12 in 2016 and he led the way with five touchdowns.
- Dropped only two of 58 catchable passes, good for the sixth-best drop rate in the nation at 3.45 percent.

AREAS TO IMPROVE IN 2017:

- Will likely see much higher volume in 2017, can he produce at all levels of the field with a Heisman-caliber quarterback?
- Would like to see more opportunities to win on the outside against man coverage.

WHAT HE DOES BEST:

- Speed and agility to make tight cuts. Excellent slot receiver who gained 1,347 yards from the slot last season, second-most in the nation.
- Dropped only 13 of 224 catchable passes over the last two years.
- Forced 24 missed tackles after the catch, tied for third in the nation in 2016 and partially a product of his catching a number of screens.

AREAS TO IMPROVE IN 2017:

- While James likely projects to the slot at the next level, it's always nice to see opportunities on the outside. Can he win against bigger cornerbacks?
- Not physical at the catch point and struggles at times with passes outside his frame.

WHAT HE DOES BEST:

- Big frame, can use it to win in contested situations.
- Good hand usage that allows him to get off press coverage. Caught 60 percent of his targets when facing press.
- Good blocker. Fourth-best run blocking grade in the nation in 2016 at 74.0 and solid blocker in the screen game as well.

AREAS TO IMPROVE IN 2017:

- Forced only 13 missed tackles on 170 career catches. Can he learn to do more after the catch?
- Can cut down on the drops as he's dropped 22 of 192 catchable passes in his career (11.5 percent).

WHAT HE DOES BEST:

- Finds a way to create big plays despite lacking burst. Averaging 20.3 yards/reception in his career.
- Excellent double move. Sells it well and creates separation. Gained 159 yards on double moves in 2016, second in the nation.
- Dropped only one pass in 2016 and has four drops on 109 catchable passes.
- Good feel for defenders after the catch and will regularly spin off tackle attempts. Forced 23 missed tackles on 105 career receptions.
- Gained 526 yards on intermediate (10-19 yard) passes, fourth-highest in the nation including a national-high 213 yards after the catch.

TIGHT END OVERVIEW

SIGNATURE STAT OVERVIEW

Yards Per Route Run

Not satisfied with Yards Per Catch or even Yards Per Target as sufficient measuring sticks for receiving production, ‘Yards Per Route Run’ makes use of our detailed snap data that breaks down what each player was doing on each play. Total receiving yards is divided by the number of plays a receiver spent out in a pattern to give a mark to their per-snap contribution.

Drop Rate

Sticky fingers or hands of stone, the league’s best (and worst) pass-catchers are highlighted in these tables. Adding up all of the catchable balls every player sees come his way and comparing it to the number that he can’t haul in, the Drop Rate gives black-and-white backing to ‘best hands/worst hands’ arguments. This Signature Stat is available for wide receivers, tight ends, and running backs.

WHAT HE DOES BEST:

- Good size and speed allow him to make plays down the field. Averaging 16.1 yards per reception in his career with 14 of his 50 receptions going for scores.
- Forced 12 missed tackles on 50 career receptions.

AREAS TO IMPROVE IN 2017:

- Sometimes has trouble adjusting to off-target passes.
- Blocking is a question mark as he's essentially a receiver for Oklahoma.
- 25 of 31 receptions came out of the slot in 2016. Would like to see him have more opportunities in-line and as an H-back.

WHAT HE DOES BEST:

- Nation's top receiving grade in 2016 at 90.6.
- Only two drops on 72 catchable passes, No. 6 drop rate in the nation.
- Good catch radius to snag off-target throws and makes tough catches over the middle of the field.

AREAS TO IMPROVE IN 2017:

- Ranked 139th as a run blocker. Finished with the sixth-lowest percentage of positively-graded run blocks in the draft class.
- Did not force a missed tackle in 2016.

WHAT HE DOES BEST:

- Good catch radius and has the ability to make plays at all levels of the field in the passing game. Ranked second in the draft class with five deep (20-plus yard) catches.
- Ranked sixth in the draft class with 1.98 yards per route. Mismatch for linebackers in the pass game.
- Improved as an in-line blocker in 2016 and showed the ability to pull and seal the edge on counter plays..

AREAS TO IMPROVE IN 2017:

- Still has room to improve when blocking defensive ends in the run game.
- Dropped six of his 53 catchable passes.

WHAT HE DOES BEST:

- Great ball skills and large catch radius allow him to routinely make one-handed catches.
- Explosive athlete with impressive vertical leaping ability (coaches say 36 inches).
- Excellent production at FCS level with 86 catches for 1,238 yards. Showed well against only FBS opponent in 2016 (five catches for 96 yards and a touchdown against TCU) .

AREAS TO IMPROVE IN 2017:

- Has room to improve as a run blocker.
- Will always be questions about competition level coming out of an FCS program, so it's important to see him dominate in 2017.

WHAT HE DOES BEST:

- May not have a true position, but he's a playmaker with the ball in his hands and dangerous when playing in space. Can be used as an H-back/slot hybrid player.
- Three years of strong receiving grades including 7.8 yards after the catch per reception in his career.
- Dropped only seven of 134 catchable passes in his career, though a lot of short passes have helped his cause.
- Had four touchdowns on screen passes, tied for the national lead among tight ends & wide receivers.

AREAS TO IMPROVE IN 2017:

- Can make some blocks when on the move, but not a classic in-line run blocker.
- Versatile player, but difficult to see a clean role at the next level. Trey Burton-type player?

TACKLE OVERVIEW

SIGNATURE STAT OVERVIEW

Pass Blocking Efficiency

Making full use of our snap data and pressure tallies, plays spent in pass protection are compared to the total number of QB disruptions allowed by each player. The Pass Blocking Efficiency (PBE) formula weighs sacks a bit heavier than hits and hurries and produces a rating that reflects the most efficient pass blockers on a per-pass-blocking snap basis with scores closer to 100 being best. We’ve got these ratings available for full O-line units and individually for tackles, guards, centers, tight ends, and running backs.

WHAT HE DOES BEST:

- Large frame allows him to move defenders both in-line and at the second level. Had 16th-highest percentage of positively-graded blocks in the draft class.
- Pass blocking efficiency of 98.9 ranked fifth in the draft class.
- Had eight games in which he didn't allow a pressure in 2016 and only allowed more than one pressure in one game.
- Ranked 12th in the class at preventing outside pressure and 13th at avoiding inside pressure.

AREAS TO IMPROVE IN 2017:

- Ranked 40th in the draft class at avoiding negatively-graded run blocks.
- Committed 20 penalties in his two years as starter.

WHAT HE DOES BEST:

- Powerful run blocker who finished with the second-highest percentage of positively-graded blocks in the draft class.
- Good size and length. Showed continued growth throughout his college career and has had success at both left and right tackle.

AREAS TO IMPROVE IN 2017:

- Ranked only 55th in the draft class at avoiding negative blocks in the run game.
- Pass blocking efficiency of 97.0 ranked only 39th in the draft class. Need to see a step forward in pass protection.
- Committed 12 penalties in 2016, tied for sixth-most in the nation.

WHAT HE DOES BEST:

- Outstanding run blocker at the second level. Can locate defenders and finish blocks. Had third-highest percentage of positively-graded blocks in the draft class.
- Also didn't lose often in the run game as he had the 11th-lowest percentage of positively-graded blocks in the draft class.
- Pass blocking efficiency of 99.2 led the draft class and gave up an outside pressure once every 141 attempts, third-best in the class.

AREAS TO IMPROVE IN 2017:

- It's the third different scheme in three years for Williams, so maintaining his production during another transition will bode well for his future.

GUARD OVERVIEW

SIGNATURE STAT OVERVIEW

Pass Blocking Efficiency

Making full use of our snap data and pressure tallies, plays spent in pass protection are compared to the total number of QB disruptions allowed by each player. The Pass Blocking Efficiency (PBE) formula weighs sacks a bit heavier than hits and hurries and produces a rating that reflects the most efficient pass blockers on a per-pass-blocking snap basis with scores closer to 100 being best. We've got these ratings available for full O-line units and individually for tackles, guards, centers, tight ends, and running backs.

2014	0	0	0	0	0	0	0

WHAT HE DOES BEST:

- Moves defenders in the run game and notched the fifth-highest percentage of positively-graded blocks in the run game in the draft class.
- Effective both in-line and on the move as a run blocker. Can locate a target as a puller.
- 90.2 overall grade ranked fourth in the nation in 2016
- Improved as a pass-blocker in 2016, allowing only one knockdown and 10 hurries on 393 pass-blocking attempts.

AREAS TO IMPROVE IN 2017:

- Makes a lot of key blocks in the run game but ranked only 27th in the draft class in avoiding negatively-graded blocks.
- Still room to improve as a pass-blocker where his 98.1 pass blocking efficiency ranked 28th in the draft class in 2016.

2014	321	129	192	2	1	0	6

WHAT HE DOES BEST:

- Has strong hands and sustains blocks well. Had 13th-highest percentage of positively-graded blocks in the run game in the draft class.
- Versatility to play either guard or center. Played 656 snaps at guard and 186 snaps at center in 2016.
- Improved every year and ranked eighth in the nation with an 88.0 overall grade in 2016.
- Outstanding puller in a power scheme, but has the skills to make all necessary blocks regardless of scheme.

AREAS TO IMPROVE IN 2017:

- Ranked only 30th in the draft class at avoiding negatively-graded run blocks.
- Tends to lean too much in pass protection and ranked only 31st in the draft class with a pass blocking efficiency of 98.1

- Handles the bull rush extremely well and did not allow any bull rush pressures in 2016.
- Good size and physicality in the run game led to the third-highest percentage of positively-graded blocks in the draft class.

AREAS TO IMPROVE IN 2017:

- Athleticism is a question mark. Can be slow on the move as a puller though he moves well enough to handle and inside/mid zone scheme.
- 26th-highest percentage of negatively-graded run blocks in the run game.
- Always a question mark when coming out of Washington State's O-Line-friendly offense.

Pass Blocking Efficiency

Making full use of our snap data and pressure tallies, plays spent in pass protection are compared to the total number of QB disruptions allowed by each player. The Pass Blocking Efficiency (PBE) formula weighs sacks a bit heavier than hits and hurries and produces a rating that reflects the most efficient pass blockers on a per-pass-blocking snap basis with scores closer to 100 being best. We've got these ratings available for full O-line units and individually for tackles, guards, centers, tight ends, and running backs.

CENTER BIG BOARD

PLAYER	SCHOOL	DRAFT DAY
Frank Ragnow	Arkansas	1
Bradley Bozeman	Alabama	2
Jake Bennett	Colorado State	3
Mason Cole	Michigan	3
Michael Deiter	Wisconsin	3
Coleman Shelton	Washington	3

*Draft day is projection to where we value these players as prospects at this point, based of their play from the 2014-16 seasons.

2015	906	420	486	5	0	4	15
2014	260	79	181	1	0	1	0

WHAT HE DOES BEST:

- Can control blocks at the point of attack and is excellent getting to the second level and making blocks in space.
- Had second-highest percentage of positively-graded blocks in the run game in the draft class.
- Had the lowest percentage of negatively-graded blocks in the run game in the draft class.
- Allowed only 12 pressures on 462 pass block attempts.

AREAS TO IMPROVE IN 2017:

- Only one year of dominant play, can he sustain it in 2017?

WHAT HE DOES BEST:

- 13th-highest percentage of positively-graded blocks in the run game in the draft class.
- Rarely off balance in and had the fourth-lowest percentage of negatively-graded blocks in the run game in the draft class.
- Allowed only seven pressures on 510 pass blocking attempts in 2016.

AREAS TO IMPROVE IN 2017:

- One-year starter, so still room to prove that 2016 was no fluke.
- Had his worst games as a run blocker down the stretch. Can he sustain production for an entire season?

WHAT HE DOES BEST:

- Can make a variety of blocks in the run game. Can reach the nose tackle in zone schemes and solid puller.
- 17th-highest percentage of positively-graded blocks in the draft class.
- Versatile player. Had success at left tackle in 2015 and can likely play center or guard at the next level.

AREAS TO IMPROVE IN 2017:

- Pass blocking efficiency of 96.9 ranked 49th in the draft class and showed susceptible to being bull rushed where he gave up pressure once every 98.3 attempts, 54th in the class.
- Has been a solid player, but looking for a more dominant effort in 2017.

WHAT HE DOES BEST:

- Showed a lot of promise in 2014 before missing all of 2015.
- Solid two-years of grading, but need to see more in 2017.

AREAS TO IMPROVE IN 2017:

- Had the 15th-highest percentage of negatively-graded blocks in the run game.
- Ranked only 48th in pass blocking efficiency at 97.0 in 2016.

WHAT HE DOES BEST:

- Physical player who showed he can make the necessary blocks in a variety of different run schemes.
- Ranked seventh in the draft class at avoiding negatively-graded blocks in the run game.
- Showed well against Alabama in College Football Playoff game.

AREAS TO IMPROVE IN 2017:

- Solid pass protector who still has room to improve after ranking 28th in pass blocking efficiency in 2016 at 97.8.

INTERIOR DEFENDER OVERVIEW

SIGNATURE STAT OVERVIEW

Pass Rushing Productivity

The single most referenced Signature Stat for the defensive side of the ball is our ‘Pass Rushing Productivity’ that calculates a score to reflect the frequency of pressure generated by a defender. All sacks, hits, and hurries are added up and (with sacks weighted heavier and some multipliers in place to give us a workable PRP score) they’re broken down on a per-pass-rushing-snap basis.

Run Stop Percentage

You finished with 120 tackles this year? That’s great, but where did you make them? If a defender is racking up tackles but not keeping the offense from getting what they were after, how meaningful are they? For our Run Stop Percentage Signature Stat, we’ve combined our tackle totals (built from viewing games retrospectively and with the aid of a rewind button, so consider their accuracy a step beyond the inconsistent numbers you’ll find in the unofficial ‘official’ stats), our run defense snap counts, and defensive Stops to produce this worthy look at individual run D production.

Stops are what we judge to be tackles that prevent an offensive success (defined as gaining 40% of required yardage on first down, 60% on second down, and the entire required yardage on third or fourth) and making more of them per run defense snap will bump you on this list. Note: for safeties, these numbers are also shown in splits for when they’ve lined up within 8 yards of the line of scrimmage.

2014	38	41	0	0	0	0	2	0	1	1

WHAT HE DOES BEST:

- Pass rush productivity of 15.3 leads all draft-eligible interior defensive linemen in 2016. Also leads with a pass rush productivity of 12.4 on sub-2.5-second pressures.
- Run stop percentage of 11.6 percent ranks sixth in the draft class.
- Quickness and power and be a three-down contributor from multiple positions along the defensive line.

AREAS TO IMPROVE IN 2017:

- Though he's dominated the last two years, has only 839 snaps in his career and has never played more than 418 in a season. Can he handle a bigger workload and maintain his productivity?
- Only seven of 64 career pressures have been sacks, can he finish more consistently?

2014	HS	HS	HS	HS	HS	HS	HS	HS	HS	HS

WHAT HE DOES BEST:

- Pass rush productivity of 10.7 ranks sixth in the draft class
- Great strength. Picked up a bull rush pressure every 20.2 rushes, second-best in the draft class
- Regularly stands up and tosses blockers in the run game and ranked 22nd in the draft class with a run stop percentage of 9.1 percent
- Had the second-highest percentage of positively-graded plays against the run in the draft class in 2016.

AREAS TO IMPROVE IN 2017:

- Played only 433 snaps in 2016 and only 628 snaps in his career. Would like to see him handle a heavier workload and maintain his production.
- Picked up outside pressure once every 55.3 snaps, only 78th in the draft class.

WHAT HE DOES BEST:

- Highest percentage of positively-graded plays against the run in the draft class.
- Upped his game as a pass-rusher on third down, ranking 29th in the class with a pass rush productivity of 10.7.

AREAS TO IMPROVE IN 2017:

- Must improve as a pass-rusher where his pass rush productivity of 5.1 ranks 86th in the draft class in 2016.
- While he's stout and disruptive in the running game, could stand to finish more plays where his run stop percentage of 8.8 percent ranked 29th in the class last season.

WHAT HE DOES BEST:

- Powerful player who continues to improve against the run. Had the 25th-highest percentage of positively-graded plays against the run in the draft class.
- Has shown the power and quickness to be an effective pass-rusher, but has to translate it to the field more consistently.

AREAS TO IMPROVE IN 2017:

- Ranked only 121st in the draft class with a pass rush productivity of 4.4. Can he develop as a pass-rusher?
- Run stop percentage of 6.9 percent ranked only 64th in the draft class.
- Not as strong at the point of attack as some of the recent Alabama defensive linemen. Can he take the next step in 2017?

- Second-lowest percentage of negatively-graded plays against the run in the draft class in 2016.
- Ranked fifth in the draft class with a run stop percentage of 12.3 percent in 2016.

AREAS TO IMPROVE IN 2017:

- Can he become a factor as a pass-rusher? Must improve his ability to disrupt quarterbacks after picking up only five sacks, two QB hits, and 19 hurries on 364 career rushes.
- Played only 744 career snaps with a career-high of 480. Can he stay healthy and remain productive in an expanded role in 2017?

WHAT HE DOES BEST:

- Much-improved run defender in 2016.
- Undersized, penetrating 3-technique with a penchant for coming up with big plays at the right time. Two years of solid pass-rush grades at 79.8 in 2015 and 81.0 in 2016.

AREAS TO IMPROVE IN 2017:

- Very few quick pressures as his pass rush productivity of 2.8 on plays in which pressure came in less than 2.5 seconds ranked 74th in the draft class.
- Run stop percentage of 5.5 percent ranked 114th in the draft class.

WHAT HE DOES BEST:

- Seventh-lowest percentage of negatively-graded plays against the run in the draft class.
- Strong three-year production in the run game with 2016 his best season at 86.1.
- Ranked 15th in the draft class with a run stop percentage of 9.3 percent.

AREAS TO IMPROVE IN 2017:

- Has provided little as a pass-rusher in three years and his 2.1 pass rush productivity ranked 193rd in the draft class in 2016.
- Only 48 career pressures (nine sacks, seven hits, 32 hurries) on 878 rushes. May only be an early-down player at the next level.

WHAT HE DOES BEST:

- Athletic big man played some running back in high school.
- Showed excellent potential as a run stopper as a true freshman in 2015 (83.6 grade).

AREAS TO IMPROVE IN 2017:

- Has shown little as a pass-rusher in two years as he's picked up only 11 total pressures on 278 rushes.
- Took a step back in 2016, can he bounce back in 2017?

EDGE DEFENDER OVERVIEW

SIGNATURE STAT OVERVIEW

Pass Rushing Productivity

The single most referenced Signature Stat for the defensive side of the ball is our ‘Pass Rushing Productivity’ that calculates a score to reflect the frequency of pressure generated by a defender. All sacks, hits, and hurries are added up and (with sacks weighted heavier and some multipliers in place to give us a workable PRP score) they’re broken down on a per-pass-rushing-snap basis.

This stat is presented for all defensive positions, so you can check in on the blitzing DBs and linebackers when you are done sorting through the game’s best edge rushers. Speaking of those typical edge rushers (4-3 DEs and 3-4 OLBs), we’ve taken their numbers apart even further, showing the damage they’ve done (or not done) from the left and right sides.

Run Stop Percentage

You finished with 120 tackles this year? That’s great, but where did you make them? If a defender is racking up tackles but not keeping the offense from getting what they were after, how meaningful are they? For our Run Stop Percentage Signature Stat, we’ve combined our tackle totals (built from viewing games retrospectively and with the aid of a rewind button, so consider their accuracy a step beyond the inconsistent numbers you’ll find in the unofficial ‘official’ stats), our run defense snap counts, and defensive Stops to produce this worthy look at individual run D production.

Stops are what we judge to be tackles that prevent an offensive success (defined as gaining 40% of required yardage on first down, 60% on second down, and the entire required yardage on third or fourth) and making more of them per run defense snap will bump you on this list. Note: for safeties, these numbers are also shown in splits for when they’ve lined up within 8 yards of the line of scrimmage.

WHAT HE DOES BEST:

- Had sixth-highest percentage of positively-graded plays vs. the run among draft-eligible Edges in 2016.
- Picked up a bullrush pressure every 59.7 rushes, ninth-best in the draft class.
- Ranked 17th among draft-eligible edge defenders with a pass rush productivity of 11.7.
- Good feel against the run and finished fifth in the draft class with a run stop percentage of 10.4 percent.

AREAS TO IMPROVE IN 2017:

- Could do a better job winning to the outside as a pass-rusher where he picked up pressure every 17 rushes, 23rd in the draft class.
- Missed 23 of his 116 career tackles attempts, one out of every 5.0 attempts.

WHAT HE DOES BEST:

- Ranked third in the draft class with a pass rush productivity of 17.5 (18 sacks, seven QB hits, and 44 hurries on 322 rushes)
- Explosive first step and bend around the edge. Picked up an outside pressure every 8.1 rushes, best in the draft class
- Ranked fifth in the nation with an 87.3 grade against the run in 2016
- Had seventh-highest percentage of positively-graded plays vs. the run among draft-eligible edge defenders in 2016.

AREAS TO IMPROVE IN 2017:

- Will get caught upfield in the run game.
- Did most of his damage against right tackles (usually the lesser pass blocker), finishing with a PRP of 19.8 from the left side and 11.8 from the right side (defense's view).

WHAT HE DOES BEST:

- Explosive edge speed, can turn the corner with ease.
- Ranked fourth in pass rush productivity among draft-eligible edge defenders.
- Only had one game with fewer than three pressures and notched at least five pressures in five games in 2016.
- Has the length and frame to add bulk while maintaining his athleticism.

AREAS TO IMPROVE IN 2017:

- Only 3.7 percent of his pressures came on bullrushes, below the draft class average of 6.4 percent.
- Still has room to improve as a run defender and can do a better job of finishing plays after missing 13 of his 77 career tackle attempts.

2014	RS	RS	RS	RS	RS	RS	RS	RS	RS	RS

WHAT HE DOES BEST:

- While he projects to more of an edge defender at the next level, pass rush productivity of 11.8 ranked fourth in the draft class among interior defensive linemen in 2016.
- Picked up pressure once every 15.7 rushes, best in the draft class.
- Run stop percentage of 9.5 percent ranked 14th in the draft class.
- Versatile player played 90-plus snaps at six different positions in 2016. Could possibly dabble at inside linebacker at the next level.

AREAS TO IMPROVE IN 2017:

- Versatile, but may not have a clean position fit at the next level. Will that work for or against him?
- Only converted five of his 55 pressures into sacks in 2016, would like to see him convert more often.

WHAT HE DOES BEST:

- Explosive run defender. Can get low and jack up blockers.
- Feels pullers well and knows how to take them out or shed quickly.
- Missed only seven of his 76 career tackle attempts.

AREAS TO IMPROVE IN 2017:

- More of a disruptor than a finisher in the run game at this point, run stop percentage of 4.8 percent ranked 99th in the draft class.
- Despite high sack totals, has not been a strong down-to-down pass-rusher through two seasons. Can he take the next step in 2017?

WHAT HE DOES BEST:

- Ranked fifth among draft-eligible edge defenders with a pass rush productivity of 14.4.
- Picked up outside pressure every 13.0 rushes, seventh-best in the draft class.
- Good hands allow him to stay clean in the run game and finished 78.4 against the run in 2016.

AREAS TO IMPROVE IN 2017:

- Only 286 career snaps. Can he handle a bigger workload and maintain his productivity?
- Slight build may make him better fit as off-the-ball linebacker.

LINEBACKER OVERVIEW

SIGNATURE STAT OVERVIEW

Run Stop Percentage

You finished with 120 tackles this year? That’s great, but where did you make them? If a defender is racking up tackles but not keeping the offense from getting what they were after, how meaningful are they? For our Run Stop Percentage Signature Stat, we’ve combined our tackle totals (built from viewing games retrospectively and with the aid of a rewind button, so consider their accuracy a step beyond the inconsistent numbers you’ll find in the unofficial ‘official’ stats), our run defense snap counts, and defensive Stops to produce this worthy look at individual run D production.

Stops are what we judge to be tackles that prevent an offensive success (defined as gaining 40% of required yardage on first down, 60% on second down, and the entire required yardage on third or fourth) and making more of them per run defense snap will bump you on this list.

Tackling Efficiency

Putting missed tackles into perspective, this Signature Stat not only boils all of the tackling data down to a simple ‘attempts per miss’ number, it also separates out the Tackling Efficiency of all linebackers and defensive backs on the snaps they’ve spent in run defense and pass defense.

Pass Rushing Productivity

The single most referenced Signature Stat for the defensive side of the ball is our ‘Pass Rushing Productivity’ that calculates a score to reflect the frequency of pressure generated by a defender. All sacks, hits, and hurries are added up and (with sacks weighted heavier and some multipliers in place to give us a workable PRP score) they’re broken down on a per-pass-rushing-snap basis.

WHAT HE DOES BEST:

- Good range in coverage. Can cover a lot of ground in zone and has the athleticism to stick with tight ends and receivers.
- Missed only six of his 78 tackle attempts.
- Can win with quicks. Flies to the ball. Dime linebacker-like skills.
- Explosive blitzing picked up four sacks, three QB hits, and nine hurries on only 48 rushes in 2016.

AREAS TO IMPROVE IN 2017:

- Undersized. Can get locked up by offensive linemen and tight ends.
- Will run into blocks and can be a step late to recognize screens and outside runs.
- Only one year of experience and 738 career snaps. Looking for another strong year of production.

WHAT HE DOES BEST:

- Flies to the ball in the run game, can beat blockers to the spot and finish plays.
- Had the seventh-lowest percentage of negatively-graded plays against the run and has a good feel for avoiding second level blocks when running sideline to sideline.
- Effective blitzing has totaled nine sacks, seven QB hits, and 12 hurries on only 115 career rushes.
- Six career pass breakups on only 25 targets.
- **AREAS TO IMPROVE IN 2017:**
- Will get engulfed by blocks. Struggles to shed cleanly, will lose gap even when he does shed.
- Will get moved out of the gap when blitzing against the run. Would like to see him do a better job of taking on offensive linemen in all situations

- Speed. Flies all over the field in all phases.
- Can cover ground in zone coverage. Six pass breakups tied for second in the nation.
- Picked up 12 sacks, five QB hits, and 11 hurries on 2016 rushes. Effective on blitzes, stunts and pure rushes where his burst challenges offensive tackles.
- Versatile defender. Dropped into coverage on 229 snaps and rushed the passes on 206 snaps.

• AREAS TO IMPROVE IN 2017:

- Missed 14 of his 86 tackle attempts in 2016. Is an exceptional player given that he has only one hand, but he still has to improve his tackling for the next level.
- Has only one year of production after a poor 2015 so has to prove himself with another strong year.

- Ranked only 115th in the draft class with a run stop percentage of 6.8 percent.
- Missed 11 out of 73 tackle attempts in 2016.
- Came into college with a lot of recruiting hype. Would like to see a season where he puts it all together in all phases

WHAT HE DOES BEST:

- Generally keeps the ball in front of him in zone coverage. Closes and wraps up.
- Quick to the ball in the run game. Can beat blockers to the spot and finish plays.

AREAS TO IMPROVE IN 2017:

- Missed too many open-field tackles in 2016. Finished with 11 total misses on 74 attempts.
- Sometimes too patient in the run game and can get caught out of position.
- Suffered season-ending injury in Week 11. Can he bounce back?

WHAT HE DOES BEST:

- Played mostly over the slot for BYU. Ranked third among draft class cornerbacks with a run stop percentage of 7.1 percent.
- Explosive player can break on the ball in zone coverage. Has six interceptions and three pass breakups on 85 career targets.

AREAS TO IMPROVE IN 2017:

- Missed 33 of his 199 tackle attempts in his career.
- Needs better feel for routes developing behind him in zone coverage.

CORNERBACK OVERVIEW

SIGNATURE STAT OVERVIEW

Coverage

Reputation can scare opponents from challenging certain defenders, or it can put a target on the back of a cover man. That reputation can be well deserved or the product of unfounded hype. In order to cut through the noise, you need to see the numbers. This set of Signature Stats tallies all things coverage related, from snaps spent in coverage to Yards After the Catch on completions aimed at each defender.

The numbers for all linebackers and defensive backs when deemed the primary cover man are here and they add up to some never-before-seen measures (Yards Per Cover Snap, Cover Snaps Per Target, and Cover Snaps Per Reception) that will help you sort out who’s getting the job done. To top it all off, as we did with the WR Rating, we’ve backcalculated the Passer Rating opponents produce when throwing at each defender.

Slot Performance

For another layer of depth in coverage data, we’ve sorted out the snaps spent covering the slot and applied the same calculations as we did in the overall coverage section. So, here you’ll find who is spending the most snaps in that increasingly important nickel corner role as well as the targets they see and the receptions, yards, YAC, TDs, and INTs they surrender from the slot.

2014	HS	HS	HS	HS	HS	HS	HS	HS	HS	HS	HS	HS

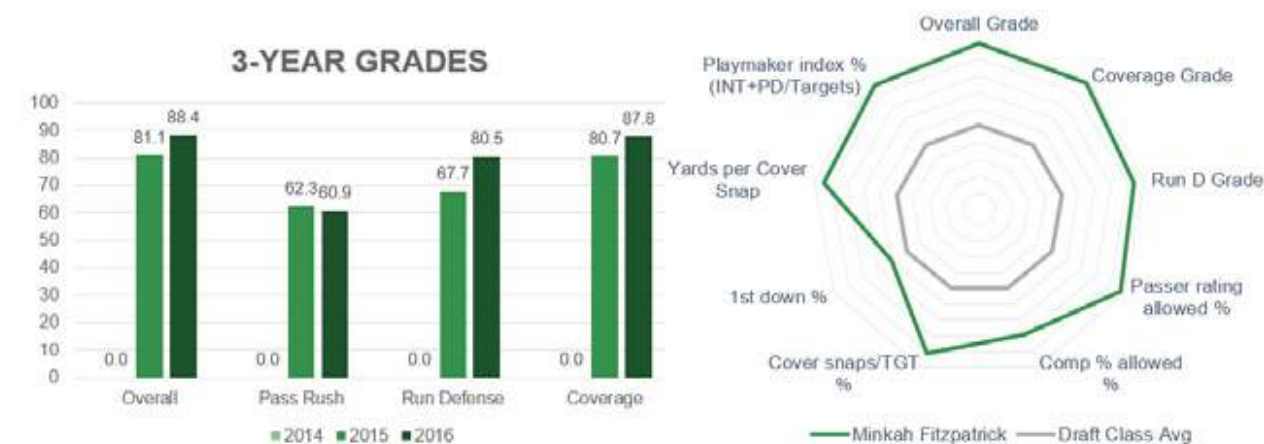

WHAT HE DOES BEST:

- Has the size and movement skills to cover outside or in the slot.
- Allowed a passer rating of only 37.8 into his coverage, second in the nation among corners with at least 60 targets.
- Allowed a passer rating of only 10.1 on deep (20-plus yard) passes.
- Forced an incompletion on 22.2 percent of his targets, 14th-best among draft-eligible cornerbacks.
- Excellent all-around skillset to be a versatile weapon at the next level.

AREAS TO IMPROVE IN 2017:

- After playing predominantly in the slot his first two seasons, will he take on a bigger role on the outside in 2017?
- Can get stuck at the top of routes.
- Has allowed six touchdowns into his coverage in his two years.

WHAT HE DOES BEST:

- Potential to play both outside and in the slot.
- Nine pass breakups in 2016, tied for seventh among draft-eligible cornerbacks.
- No. 8 grade in the nation when targeted on deep (20-plus yard) passes.
- No. 3 grade in the nation when targeted on intermediate (10-19 yard) passes.
- Appears to have the speed to stay on top of routes down the field.

AREAS TO IMPROVE IN 2017:

- Can get outmuscled by bigger wide receivers.
- Must tackle better after missing eight of his 60 attempts in his first two seasons.

WHAT HE DOES BEST:

- Improved as the season progressed in 2016, always seems to learn from his mistakes.
- Can mirror receivers and turn and run with them down the field. Stays in-phase consistently. Played press coverage on 46.7 percent of snaps, sixth-highest among draft-eligible cornerbacks.
- Forced an incompletion on 23.2 percent of targets, ninth-best among draft-eligible cornerbacks.
- Missed only two of his 46 tackle attempts in 2016.

AREAS TO IMPROVE IN 2017:

- A lot of big play opportunities came against double moves, cover-2 route combos, and picks.
- Can get bodied by bigger wide receivers.

WHAT HE DOES BEST:

- Good ball skills when he turns to find the ball, can complete plays. Finished with eight interceptions and seven pass breakups in 2016.
- No. 8 grade in the nation when targeted on deep (20-plus yard) passes and led the nation with six interceptions on deep passes.
- No. 10 grade in the nation when targeted on intermediate (10-19 yard) passes.
- Has the size to re-direct receivers and played more press coverage than any draft-eligible cornerback (55.0 percent).
- Eight total interceptions tied for national lead in 2016.

AREAS TO IMPROVE IN 2017:

- Tackling is an issue. Seven misses on only 32 career attempts,
- Has some awkward downfield moments and gave up far too many big plays including 15.4 yards/rec and seven touchdowns,

- Looks comfortable playing off coverage.
- Physical taking blockers out in the screen game.

AREAS TO IMPROVE IN 2017:

- Tackling must improve. Missed 15 tackles on only 60 attempts in his career.
- Allowed 15.3 yards/reception and four touchdowns in 2016. Has to cut back on the big plays.

2014	14	2	4	3	16	16	69.6%	283	3	2	3	114.7

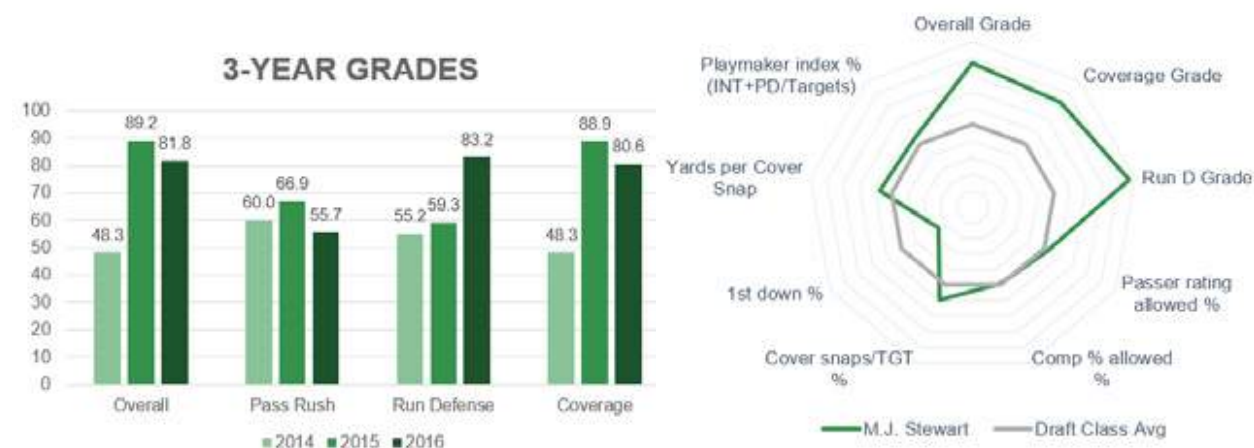

WHAT HE DOES BEST:

- Has the shiftiness to cover in the slot. Allowed only 0.84 yards/cover snap in the slot in 2016, tied for ninth among draft-eligible cornerbacks.
- Allowed a passer rating of only 54.4 when targeted in the slot in 2015, fourth-best in the nation.
- Played extremely well against the run in 2016, finishing 13th in the nation at 83.2.
- Closes quickly in zone coverage.

AREAS TO IMPROVE IN 2017:

WHAT HE DOES BEST:

- Speed. One of the fastest players in the nation and it shows up on tape.
- Even when WR has a step, he catches up in a hurry. Allowed a passer rating of only 26.8 on deep (20-plus yard) passes, 11th-best in the nation.
- Nifty short-area footwork that gives him slot potential at the next level. Not just a straight-line athlete.

AREAS TO IMPROVE IN 2017:

- Moves well, but may have some issues with start/stop on longer curls/comebacks. Had the nation's third-worst grade on curls and comebacks, though the sample was small with only nine targets on such routes.
- Missed six tackles on only 22 attempts in 2016, must show more physicality as a tackler.

- Has a knack for forcing fumbles (four last season).
- Missed only eight of his 98 career tackle attempts.
- Made 13 stops in the passing game, tied for 13th in the nation in 2016.

AREAS TO IMPROVE IN 2017:

- Gives up too much separation in off coverage, allowing receivers too cross his face too often.
- Can be outmuscled, though he flashes a willingness to be physical. Need more consistency in this area.

2014	49	4	8	18	38	38	54.3%	399	3	6	7	49.6

WHAT HE DOES BEST:

- Allowed a passer rating of only 32.5 into his coverage in 2016.
- Has 18 pass breakups and 10 interceptions on 181 career targets.
- Missed only 20 of 147 tackle attempts in his career.
- Experienced. 2,332 career snaps.

AREAS TO IMPROVE IN 2017:

WHAT HE DOES BEST:

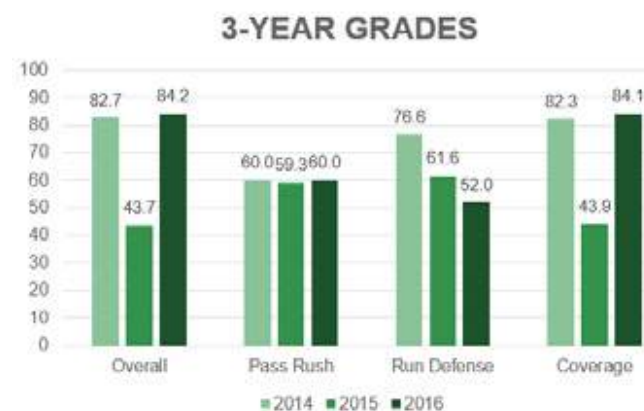

- Makes a lot of plays on the ball. 13 pass breakups led all draft-eligible cornerbacks.
- Attacks and blows up screen passes, allowed only 2.6 yards/attempt on screens.

AREAS TO IMPROVE IN 2017:

- Will get lost down the field. Gives up on plays.
- Gets turned around in off coverage and gives up too much separation at the top of the route.

WHAT HE DOES BEST:

- Good size and movement skills.
- Can play physical and is comfortable playing off coverage.

AREAS TO IMPROVE IN 2017:

- Acceleration may be an issue, will be late closing on the ball.
- Must show better feel for zone coverage.
- Gave up seven receptions for 124 yards on 10 targets when in press coverage. Would like to see him use his size better in those situations.

SAFETY OVERVIEW

SIGNATURE STAT OVERVIEW

Run Stop Percentage

You finished with 120 tackles this year? That’s great, but where did you make them? If a defender is racking up tackles but not keeping the offense from getting what they were after, how meaningful are they? For our Run Stop Percentage Signature Stat, we’ve combined our tackle totals (built from viewing games retrospectively and with the aid of a rewind button, so consider their accuracy a step beyond the inconsistent numbers you’ll find in the unofficial ‘official’ stats), our run defense snap counts and defensive ‘Stops’ to produce this worthy look at individual run D production.

Stops are what we judge to be tackles that prevent an offensive success (defined as gaining 40% of required yardage on first down, 60% on second down and the entire required yardage on third or fourth) and making more of them per run defense snap will bump you on this list.

Tackling Efficiency

Putting missed tackles into perspective, this Signature Stat not only boils all of the tackling data down to a simple ‘attempts per miss’ number, it also separates out the Tackling Efficiency of all linebackers and defensive backs on the snaps they’ve spent in run defense and pass defense.

WHAT HE DOES BEST:

- Finished as the nation's top-graded safety as a true freshman in 2016 at 91.0 overall. He ranked fourth against the run (84.7), second as a pass-rusher (78.0) and 30th in coverage (81.4).
- Can win from anywhere on the field and Florida State uses him in that capacity. Can play deep safety, box safety, and has even had success as a pure pass-rusher.
- Has the size and athleticism to match up with tight ends and receivers in man coverage.

AREAS TO IMPROVE IN 2017:

- Injury limited him to only 100 snaps in 2016. Health will be the biggest priority in 2017.
- Allowed 14.3 yards/reception in 2015, so there is still room for improvement in both man and zone coverage.

2014	91	17	10	23	30	18	60.0%	138	1	3	1	42.8

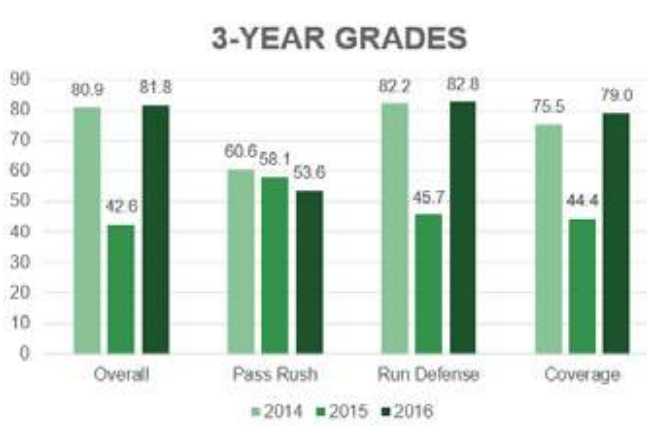

WHAT HE DOES BEST:

- Not a big hitter, but missed only 5.6 percent of his tackle attempts, fourth-best among draft-eligible safeties in 2016.
- 29 defensive stops ranked second among draft-eligible safeties in 2016.
- Doesn't always fare well when engaging blocks, but can sift through the trash to find the ball in the run game.
- Breaks on the ball well in front of him and on in/out breakers when playing in quarters coverage.

AREAS TO IMPROVE IN 2017:

- Would like to see more plays as a pure center fielder. Hit or miss at the catch point.
- Aggressiveness breaking on the ball in quarters can be used against him and he'll bite on double moves.
- Had a poor 2015 sandwiched around two strong seasons in 2014 and 2016.

WHAT HE DOES BEST:

- Good feel for the game. Recognizes routes, breaks on screens, makes plays in underneath coverage with eyes on the quarterback.
- Sure tackler who has missed only 11 of his 89 career attempts.
- Good zone defender. Breaks quickly on the ball, can use his length to break up passes (seven pass breakups and four interceptions on 92 career targets).

AREAS TO IMPROVE IN 2017:
